Weight	15g	(0.53 oz)

What Makes Our Wine Can Truly Revolutionary? Start With The Shape, Finish With The Cap.

- Single serve wine can with unique contour shape resembling a traditional glass wine bottle
- Consumer easily identifies the contents as wine related rather than confusing it for soda or beer
- Proprietary laminated film specially designed for prolonging product freshness and taste. Unlike spray-on internal coatings our film is a part of the aluminum coil from the start, ensuring the best protection for your wine.
- Fully re-sealable premium screw cap allows consumer to sip and go at their own pace
- Use your existing wine label to immediately brand the wine can

- Shrink label also available for all-over contemporary look
- TTB approved 250ml size for 2, 3, 4, & 6 packs of wine
- 100% infinitely recyclable aluminum
- Lightweight, highly portable, non-breakable
- Light proof and airtight protection for your wine products
- Perfect amount for one, but still enough to share
- Approved filler audit performed by Somec with Daiwa Can; wine analysis performed by third party lab

Moving Wine Beyond The Beer Can
